

SERENA FERRARO

Aspiring Software Developer

Glasgow, Scotland | +44 7716 900528 | serenaferraro21@gmail.com | github.com/Serena293

PROFILE

Aspiring Software Developer transitioning into technology after an international career in aviation and customer-facing roles. Having lived and worked across multiple countries, I developed a strong interest in travel technology and digital products that help people explore the world. Since 2024, I have been building my software development skills through structured training and personal projects, focusing primarily on JavaScript and modern web development. I enjoy creating practical applications, researching solutions to unfamiliar problems and continuously learning through hands-on projects. Pre-settled status holder with unrestricted right to work in the UK.

PROJECTS

Destination Explorer | Travel Discovery Application

Built a travel discovery application inspired by my interest in travel and international experiences. Developed with React, React Router and Bootstrap, it enables users to explore destinations, search for cities, create personalised shortlists and plan future trips.

- Created destination filtering and a reusable component architecture.
- Integrated an external API for city search and persisted personalised shortlists using local storage.
- Added an interactive 3D globe, responsive interface and accessible contact forms integrated with Formspree.

Technologies: JavaScript, React, React Router, Bootstrap, REST APIs, Git, GitHub

Live demo: destination-explorer-brown.vercel.app | **GitHub:** github.com/Serena293/destination-explorer

Job Organizer | Career Management Application

Developed a full-stack web application that helps users organise job applications, interviews, deadlines and career-related documents in one place. Used Vue.js for the frontend and Spring Boot for backend services.

- Implemented user authentication, account management, application tracking and interview organisation.
- Added document upload and storage, plus a responsive interface with light and dark modes.
- Deployed the full-stack application to the cloud.

Technologies: Vue.js, Java, Spring Boot, Full-Stack Development, Cloud Deployment

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React, Vue.js, HTML5, CSS3, Bootstrap

Backend & APIs: Java, Spring Boot, REST APIs

Tools & Practices: Git, GitHub, Chrome DevTools, Responsive Design, Component-Based Development

EDUCATION & TRAINING

Full Stack Development Bootcamp | EPICODE | 2024-2025

- Completed intensive training in JavaScript, React, Java, Spring Boot and software development fundamentals.
- Developed individual and collaborative projects using modern development tools and workflows.
- Gained experience with APIs, version control and full-stack application architecture.

Frontend Practicum Programme | Mayerfeld Consulting | 2025

- Applied frontend development skills through collaborative project work.
- Developed responsive user interfaces and worked within a team to deliver project requirements.

High School Diploma (Professional Institute) | Italy

Final grade: 97/100

Additional training: Google IT Automation with Python (Coursera); Google IT Support: Technical Support Fundamentals (Coursera)

PROFESSIONAL EXPERIENCE

Flight Attendant | SmartLynx Airlines & Ryanair | 2021-2023

- Delivered excellent customer service and resolved passenger issues in fast-paced, high-pressure environments while maintaining professionalism and attention to detail.
- Worked closely with multicultural teams to support safe and efficient operations.
- Adapted quickly to changing situations and communicated effectively with people from diverse backgrounds.

Hospitality Roles | Various Locations | 2015-2020

- Provided customer service in busy hospitality environments, managing enquiries, complaints and payment transactions.
- Maintained high service standards while balancing multiple priorities.
- Built strong communication and interpersonal skills through daily customer interaction.

ADDITIONAL INFORMATION

Languages: English and Italian

International experience: Lived and worked in the UK, Sweden, Australia, New Zealand and the United States

UK work authorisation: Pre-settled status with unrestricted right to work in the UK
